Once you have your two pairs of heart place them together with the right sides facing outwards. That is place the smoother centres together. Join using Dc/sc through both hearts stitches. Dc/sc around the edge, leaving a small gap in the middle of one for the sides for your stuffing.

One of the bonuses of this method is that you don't need to use stuffing if you don't have any. Simply joining the two hearts creates a puffy finished piece. Remember to keep all your tails inside the hearts then you don't need to weave in the ends!

If you do want to use some stuffing you can use anything, yarn ends, fabric cabbage or indeed real wadding material.

Once the stuffing is in place, and evened out, you can continue to Dc/sc the gap closed and you are done.
